

Warming blankets and mats

temperature control from above and below with pressure-relief

ADULTS II

Type	- 904
Size* (LxW)	- Upper section 70 x 160 cm
	- Lower section 110 x 62 cm
Weight	- about 1590 g

- The Adults II of the **MoeckWarmingSystem®** is fitted with four air inlets
- The integrated upper-body blanket can be placed over the patient at any time
- To provide maximum flexibility, the integrated upper-body blanket is separable using snap-fasteners in the breast area or at the head opening.

Standard positioning aids and patient positioning systems can be used together with the Adults II. Our customers usually use this textile product solution for medium-length to long gynaecological, urological, and surgical operations.

* since the textile products shrink during the first specialized washing cycles, the specified dimensions of the usable surface (excluding air inlets) apply after several cycles and with a tolerance of ± 2 cm.
