

Warming mats

temperature control from below with pressure-relief

BABY/ INFANT

Type	- 902
Size* (LxB)	- 124 x 52 cm wings 94 x 48 cm
Weight	- about 860 g

- The Baby/Infant mat of the **MoeckWarmingSystem®** is fitted with four air inlets
- An integrated hood and lateral wings offer optional cooling protection by covering the head and the abdominal area.

Due to its flexible textile nature, the baby/infant mat can easily be folded to incubator size. Where needed, the mat can be turned into a kind of sleeping bag by folding it over - its size can be adjusted using the snap-fasteners on the side. Our customers usually use this textile product solution in paediatrics together with positioning aids.

* since the textile products shrink during the first specialized washing cycles, the specified dimensions of the usable surface (excluding air inlets) apply after several cycles and with a tolerance of ± 2 cm.
