

Warming blankets

temperature control from above

LOWER BODY BLANKET

Type	- 897
Size* (LxB)	- 111 x 115 cm
Weight	- about 450 g

- The lower body blanket of the **MoeckWarmingSystem®** is fitted with a single air inlet

Our customers usually use this textile product solution for short surgical procedures in the upper breast area. The lower body blanket is also ideal for full body temperature control in babies and infants.

* since the textile products shrink during the first specialized washing cycles, the specified dimensions of the usable surface (excluding air inlets) apply after several cycles and with a tolerance of ± 2 cm.
