

Warming mats

temperature control from below with pressure-relief

UNIVERSAL III

Type	– 910
Size* (LxW)	– 110 x 62 cm
Weight	– about 1200 g

- The Universal III from the **MoeckWarmingSystem**[®] is fitted with four air inlets
- The mat covers about 60% of the surface of the OR table, enabling temperature control of the patient and a pressure-relieving position
- When needed, an integrated filament fabric hood offers optional cooling protection by covering the head and the shoulders.

Our customers usually use this textile product solution for short- to medium-length gynaecological, urological, and surgical operations.

* since the textile products shrink during the first specialized washing cycles, the specified dimensions of the usable surface (excluding air inlets) apply after several cycles and with a tolerance of ± 2 cm.
